

PL4-HS User Manual V1.1

PL4-HS – Low light payload release for SplashDrone 3+. For low-light and night-time payload release, the PL4 utilizes a high-sensitivity sensor and dual LED spotlights to return colour HD images in near darkness. Get live as well as recorded video footage from the drone and accurately locate your target zone at night before remotely dropping your baits. Add the optional burley dry chum release system takes your night fishing to the next level.

3. Camera

PL4 camera comes with a high sensitive sensor and a LED fill light, allows capturing color HD images even in the dark.

Install Micro SD card

1. Open the soft rubber sealing plug at the top of the camera, install the Micro SD card in correct direction.
2. Refasten the rubber plug firmly to ensure a good seal.

- ⚠ 1. The SwellPro PL4 camera supports Micro SD cards with a maximum capacity of 64GB. When selecting a Micro SD card for use with your camera, for best results always ensure that the card is rated for 4K video throughput Class 10 or UHS-1 or better.
- ⚠ 2. After installing the SD card, please fasten the rubber plug firmly to avoid water damage.
